

News Story – Our New Toddler Room

The toddlers moved into their wonderful new room this week, and they've adapted really well. They've had a great time playing with all the new, incredible toys and the brand-new play gym. The children have loved playing with all of the resources in the mark-making area, writing and creating lovely illustrations as a way to express themselves and communicate whilst honing their fine motor skills.

The children have also had a great time playing on the play gym, where they carefully ascended the stairs, crossed the bridge, and down the slide while having a great time and honing their gross motor skills.

Children's attention has also been drawn to the home area, as they all enjoyed playing and hosting tea parties.

The children have been learning about shapes, such as squares, rectangles, and triangles. Children have also been matching the shapes to the ones drawn on the tuff tray.

Children have had a lot of fun creating their own incredible creations in the maths area, playing with the magnetic coloured shapes. They have also been working on their counting abilities by keeping track of how many shapes they used while building. The children have been applying their critical thinking and problem-solving skills as they experimented with assembling and dismantling the magnetic forms.

The construction area has colourful wooden puzzles, cars, animals, and wooden figures. The children had a great time playing there and creating their own incredible masterpieces.

With cushions, large teddies, a variety of children's books, as well as a selection of finger puppets, the book corner is incredibly comfortable and relaxing!

The sand area has many sand toys such as buckets, spades, stones, moulds, and shells.

Last but not least is our messy play area, where children use a variety of equipment to play with items such as play dough. They include rolling pins, cutters, wooden spoons, baking trays, and cupcake boxes.
