

## News Story – Pizza Day

Today was Pizza Day, and the children had the opportunity to create their own pizzas to take home, the children were really excited to make pizzas. We began the process by putting on pizza sauce onto the dough. Children spread the sauce using spoons, showing good control while spreading the sauce across the pizza base. We also engaged in a discussion about the ingredients of the pizza sauce, and most of the children correctly identified that it is made from tomatoes.

Next, we asked the children to choose their preferred toppings, and a majority expressed a desire for sweetcorn, so we decided to add some to the pizzas. As they placed the sweetcorn on their creations, I prompted them by asking about its colour, to which they accurately responded, "yellow." Following this, the children sprinkled cheese over the pizza base. The final step involved placing the pizzas in the oven to bake. Once the pizzas were ready, the children admired their creations and took some home to enjoy.
