

## News Story – Earth Day

Today, we celebrated Earth Day! Apa organized a fun activity around recycling and non-recycling. We used paper cups, plastic cups, cardboard lids, wooden spatulas, and cut-out items to show what goes in each recycling bin.

The children were super excited to join in and start making the bins. They followed the instructions and got help from Apa to put everything together.

Children demonstrated great hand-eye coordination by using the cut-out items to sort them in correct bins. They were able to say words like bottles, plastic, food, paper, and cardboard, clearly

communicating about recycling and non-recycling items.

Throughout the activity, the children were full of energy and enthusiasm, showing their enjoyment with big smiles. After we finished, the children were having fun using the lever to lift the bin lid, boosting their fine motor skills and thinking abilities.
